Precision Structures Inc.

Prepared by: SSC Digital Services Date: March 2026

Project Recap

Over the past engagement, we built a professional website for Precision Structures Inc. that showcases your truss manufacturing capabilities, your company's 35+ year history, and makes it easy for builders and contractors across the Intermountain West to reach you.

The site includes six pages — Home, About, Services, Gallery, Contact, and a dedicated page for your AI assistant — all deployed on Azure Static Web Apps with a staging environment for safe previewing. The foundation is solid. What remains is a final round of refinement, a thorough launch process, and a conversation about what comes next.

This proposal outlines exactly what that looks like.

Recommended Engagement Structure

We suggest a phased approach so nothing gets rushed and you only pay for what you need:

- **Phase 1: Finalize & Launch** — Immediate (4 weeks)
- **Phase 2: Growth Tools** — Within 60 days of launch
- **Phase 3: Ongoing Support** — Monthly, as needed

Phase 1 is the only commitment required to go live. Phases 2 and 3 are available when you're ready.

Base Package — Site Finalization & Launch

This is what it takes to get your site from "nearly done" to "confidently live."

Scope of Work

- **Final content review round** — We generate page-by-page review PDFs of every page on the site. You mark them up (print and circle things, use a PDF editor, or just email us notes — whatever's easiest). We implement your changes.
- **Contact form backend** — Wire up the contact form to actually deliver submissions to your inbox via Azure Functions and email delivery. Right now it's front-end only.

sitemap, and optimized meta titles and descriptions for every page.

- **Security hardening** — Content Security Policy headers, form spam protection (honeypot + rate limiting), and input sanitization.
- **Accessibility fixes** — Skip-to-content navigation link, color contrast verification against WCAG standards, and alt text audit on all images.
- **Content verification** — Copyright year update, phone numbers, email addresses, service area, and hours confirmed accurate across all pages.
- **Cross-browser and mobile testing** — Chrome, Firefox, Safari, Edge. iPhone, Android, tablet, desktop.
- **Staging review with you** — We walk through the staging site together before anything goes to production.
- **Production deployment and go-live** — We handle the merge, monitor the deployment, and verify everything works.
- **Post-launch smoke testing** — Forms tested, links checked, load times verified, SSL confirmed, analytics firing.

Deliverables

- Working production website at your domain
- Page review PDFs for all 6 pages
- Test results documentation
- Completed go-live checklist

Pricing

TIER	PRICE	BEST FOR
Lean	$2,500	Minimal content changes, straightforward launch
Standard	$3,200	Moderate content updates, thorough QA cycle
Premium	$4,000	Significant content revisions, extended testing, extra revision round

This is a one-time cost. The tier depends on how much changes after you review the PDFs. Most clients land in the Standard range.

Optional Add-Ons

These are available now or after launch. No pressure — they're here so you know what's possible.

AI Chatbot Enhancement

Your site already has a chatbot interface. This add-on makes it real — live AI responses trained on your business, not canned answers.

- Backend API proxy so the chatbot gives live, intelligent responses
- Persona and voice training — it sounds like Precision Structures, not a generic robot
- Lead capture integration — when someone asks about a quote, their info gets routed to you
- Usage analytics — see what people are asking and how the chatbot performs

Pricing: $1,500 – $2,500 (one-time setup) + approximately $50–$150/month for AI API usage costs

Why it's worth considering: The chatbot interface is already built. This is mostly backend work to bring it to life. It's the fastest add-on to implement and gives your site a genuine differentiator — most truss companies don't have anything like it.

Client Update Portal

A secure, simple admin interface so you can make basic content changes yourself without calling us every time.

What's included:

- Secure login for authorized users
- Editable fields for text, images, and contact information
- Preview-before-publish workflow — see changes on staging before they go live
- Version history and one-click rollback if something goes wrong

Pricing: $3,000 – $5,000 (one-time build) + $100–$200/month for hosting and maintenance

Why it's worth considering: If you anticipate frequent updates — new gallery photos, seasonal messaging, team changes — this pays for itself quickly by reducing your dependence on us for small changes.

Email-to-Staging Update Workflow

Send us an email describing what you want changed. AI parses your request, stages the change, and you approve it before it goes live.

What's included:

- Dedicated update request email address (e.g., updates@precisionstructures.net)
- AI-powered parsing of your plain-English requests
- Structured review queue so nothing gets lost
- Staging preview with one-click approval to publish

Pricing: $2,500 – $4,000 (one-time setup) + $200–$400/month for operation and monitoring

Why it's worth considering: This is the "just email us and it happens" workflow. No portal to learn, no logins to remember. You describe what you want in normal language and it gets done.

Monthly search engine optimization to help contractors and builders find you when they search for truss manufacturers in Utah, Idaho, Wyoming, Colorado, Nevada, and Montana.

What's included:

- Monthly SEO monitoring and optimization
- Content recommendations to build search authority
- Local SEO management — Google Business Profile optimization and maintenance
- Monthly performance reporting with plain-language summaries

Pricing: $500 – $1,000/month

Social Media Support

Consistent presence on Facebook and Instagram without you having to think about it.

What's included:

- Content calendar development aligned with your business
- 4–8 posts per month, created and scheduled
- Platform management for Facebook and Instagram

Pricing: $400 – $800/month

Analytics Dashboard

Know what's happening on your site — who's visiting, where they come from, and what they do.

What's included:

- Google Analytics 4 setup and configuration
- Monthly performance reporting
- Conversion tracking on contact form submissions and chatbot interactions

Pricing: $500 (one-time setup) — included at no extra charge if bundled with the SEO package

---

Assumptions

A few things we're assuming so there are no surprises:

- **Gallery photos.** The site currently uses AI-generated placeholder images. You'll either provide real project photos or formally approve the current images for production use.
- **Feedback turnaround.** We ask for feedback on review PDFs within 5 business days to keep the timeline on track.

standard hourly rate.

- **Hosting costs.** Azure Static Web Apps hosting is billed separately by Microsoft, typically $10–$25/month. This is your cost, not ours.

Timeline

WEEK	MILESTONE
Week 1	Page review PDFs delivered; you review and mark up
Week 2	Your changes implemented; staging site updated for your review
Week 3	QA, security hardening, cross-browser and mobile testing
Week 4	Go-live, production deployment, post-launch smoke testing
Weeks 5–8	Optional add-on implementations (if selected)

Why This Approach

We could try to do everything at once, but that's how projects get complicated and expensive. Instead:

- **Staging-first workflow** — You see and approve everything before it goes live. No surprises.
- **Incremental delivery** — We ship in phases so you can course-correct early, not after we've built the wrong thing.
- **No overbuild** — We're not proposing tools you don't need. The add-ons are there if and when they make sense for your business.
- **Grows with you** — Start with the base package. Add the chatbot when you're ready. Layer in SEO when you want to invest in growth. There's no lock-in and no artificial urgency.

We've enjoyed building this site. Your business has a real story — 35 years of quality work, family ownership, a genuine reputation in the industry. The website should reflect that, and we want to make sure it does before it goes live.

Approval & Next Steps

1. **Review this proposal** — Take your time. Ask questions.
2. **Select your package** — Base package plus any add-ons that interest you.
3. **We deliver page review PDFs** — You mark them up however is easiest for you.
4. **Implementation begins** — Upon your approval of scope and pricing.
5. **Launch within 4 weeks** — From the day we kick off.

To get started, just reply to this email or give us a call. We're happy to walk through any of this in person or over the
