SEO & AI Discoverability Plan

Search Optimization & 90-Day Roadmap

PREPARED FOR	PREPARED BY	DATE	DOCUMENT
Precision Structures Inc.	EBYG Automation — SSC Digital Services	March 19, 2026	09 of 17

Prepared: March 2026 **Site:** precisionstructures.net **Industry:** Truss Manufacturing (B2B + B2C) **Location:** Hooper, Utah | Service Area: UT, ID, WY, CO, NV, MT

1. Current-State Audit

What's Working

ELEMENT	STATUS	NOTES
robots.txt	Present	Allows all, includes sitemap reference
sitemap.xml	Present	6 URLs, correct priorities
Meta descriptions	Present on all pages	Relevant, keyword-rich
Open Graph tags	Present on all pages	Title, description, site_name, locale
Page titles	Well-structured	Include brand name and location
Heading hierarchy	Good	H1 on each page, logical H2/H3 structure
Mobile responsive	Yes	Breakpoints at 900px and 600px
Semantic HTML	Yes	nav, section, footer, proper heading levels
Alt text on images	Present	Descriptive alt attributes
Clean URLs	Yes	Simple .html file names

What's Missing or Weak

ELEMENT	STATUS	PRIORITY
Structured data (JSON-LD)	**Missing**	HIGH
Canonical tags	**Missing**	HIGH
Sitemap lastmod dates	Stale (2025-01-01)	MEDIUM
OG images	**Missing**	MEDIUM
Google Analytics	**Not installed**	HIGH
Google Search Console	**Not connected**	HIGH
Google Business Profile	Unknown	HIGH (local SEO)
Content Security Policy	Missing (not SEO but related)	MEDIUM
FAQ structured data	**Missing**	HIGH (AIO)
Blog / content hub	**Missing**	MEDIUM (long-term)
Internal linking strategy	Minimal	MEDIUM
Image optimization	Unknown (need to check file sizes)	MEDIUM
Page speed optimization	Not tested	MEDIUM

2. Metadata & Title Gaps

Current Titles (Good)

- Home: "Precision Structures Inc. | Family-Owned Truss Manufacturing | Hooper, Utah"
- About: "About Us | Precision Structures Inc."
- Services: "Services | Precision Structures Inc."
- Gallery: "Gallery | Precision Structures Inc."
- Resources: "Resources & AI Tools | Precision Structures Inc."
- Contact: "Contact | Precision Structures Inc."

Recommendations

- Add location to subpage titles: "Services | Truss Manufacturing | Precision Structures Inc."
- Services could be more specific: "Roof & Floor Trusses | Custom Design | Precision Structures Inc."
- Contact could target bid intent: "Get a Bid | Contact Precision Structures Inc. | Hooper, UT"

Meta Description Improvements

- Include call-to-action phrases ("Get a free bid today")
- Add phone number to contact page description
- Include service area in home page description

3. Heading Structure Review

All pages have proper H1 tags. Structure is generally good.

Recommendations:

- Ensure only ONE H1 per page (currently correct)
- Add more descriptive H2/H3 tags on resources page for each truss type section
- Gallery page could benefit from H2 for each category section

4. Schema / Structured Data Opportunities

HIGH PRIORITY — Implement Now

LocalBusiness Schema (every page)

```
{
  "@context": "https://schema.org",
  "@type": "LocalBusiness",
  "name": "Precision Structures Inc.",
  "description": "Family-owned truss manufacturing...",
  "telephone": "(801) 985-3000",
  "email": "bids@precisionstructures.net",
  "address": { ... },
  "openingHours": "Mo-Fr 08:00-16:00",
  "areaServed": [...],
  "foundingDate": "1990"
}
```

Service Schema (services page)

- One Service entry per service type (roof, floor, custom)

FAQ Schema (resources page)

- Truss terminology as FAQ pairs
- Common questions from chatbot fallback responses

BreadcrumbList Schema (all subpages)

- Already have visual breadcrumbs, add structured data to match

MEDIUM PRIORITY — Phase 2

Product Schema — if they want to list specific truss products **Review/Testimonial Schema** — when they have customer reviews **HowTo Schema** — for the "How It Works" process section

---

5. Internal Linking Opportunities

FROM	TO	ANCHOR TEXT SUGGESTION
Home services cards	services.html#roof-trusses (specific sections)	"Learn about roof trusses"
About page	services.html	"See our services"
Services page	resources.html#terminology	"Truss terminology guide"
Services page	resources.html#estimate	"Get an instant estimate"
Gallery items	services.html (matching category)	Link by service type
Resources estimate	contact.html	"Get an accurate bid"
All pages	contact.html	Multiple CTAs already good

Current internal linking is decent — CTAs point to contact page. Could improve cross-linking between services and resources.

---

6. Local SEO Opportunities

Google Business Profile

- **CRITICAL**: Verify or create Google Business Profile
- Category: "Truss Manufacturer" or "Building Materials Supplier"
- Add photos, hours, service area
- Link to website
- Encourage customer reviews

Local Keyword Targets

- "truss manufacturer Utah"
- "roof trusses Hooper Utah"
- "truss company near me" (within service area)

- "floor trusses Idaho/Wyoming/Colorado/Nevada/Montana"
- "truss delivery Rocky Mountain"

NAP Consistency (Name, Address, Phone)

Ensure consistent across: website, Google Business, Facebook, Instagram, any directories. Current site NAP: Precision Structures Inc. | 5333 S. 5500 W., Hooper, UT 84315 | (801) 985-3000

---

7. Page Speed / Technical SEO

Items to Check

- [ ] Image file sizes (compress if >200KB per image)
- [ ] Google PageSpeed Insights score
- [ ] Core Web Vitals (LCP, FID, CLS)
- [ ] Font loading performance (preconnect is already in place)
- [ ] Unused CSS (minimal concern — single file, 693 lines)

Likely Quick Wins

- Add `loading="lazy"` to gallery images (some already have it)
- Optimize gallery JPGs (if large)
- Add `width` and `height` attributes to images (prevent CLS)
- Consider `font-display: swap` in Google Fonts URL

---

8. Image & Asset Optimization

- Gallery images: verify file sizes, compress if needed
- Logo.PNG: check size, consider converting to optimized PNG or SVG
- Add `width` and `height` to all `<img>` tags for layout stability
- All images have alt text (good)
- OG image needed: create a branded share image (1200×630px)

---

9. Content Recommendations for Authority

Blog / Content Hub (Phase 2)

Adding a simple blog or "Project Spotlight" section would dramatically help SEO:

- "What is a roof truss?" (educational, targets long-tail searches)
- "How to prepare for a truss delivery" (practical, builds trust)
- "Choosing the right truss type for your project" (decision-making)
- "Snow load requirements in Utah" (local expertise)
- Project case studies with photos

Immediate Content Opportunities

- Add more detail to services pages (word count helps)
- Add customer testimonials (social proof + content)
- Add a simple FAQ section to the contact page

---

10. FAQ / Answer-Block Opportunities for AI Discoverability (AIO)

AI-powered search engines (Google AI Overviews, Perplexity, ChatGPT search) favor:

- **Clear, direct answers** to specific questions
- **Structured content** (headings, lists, tables)
- **FAQ blocks** with Schema.org markup
- **Authority signals** (specific expertise, unique data)

Recommended FAQ Content (implement as FAQ section with schema)

1. **What is a roof truss?** — A prefabricated structural frame...
2. **How much do trusses cost?** — Pricing varies by span, pitch...
3. **What areas does Precision Structures serve?** — Utah, Idaho...
4. **How long does it take to get trusses made?** — Typical lead time...
5. **What information do I need to request a bid?** — Blueprints, span...
6. **What types of trusses do you manufacture?** — Fink, Howe, Pratt...
7. **Do you deliver trusses to the job site?** — Yes, across 6 states...
8. **Can you do custom truss designs?** — Absolutely, our engineering team...
9. **What is a truss pitch?** — The slope of the roof expressed as...
10. **How do I submit plans for a bid?** — Email to bids@precisionstructures.net...

These answers already exist in the chatbot fallback responses — we can repurpose them as on-page FAQ content with schema markup.

11. Trust Signals & Conversion Signals

Currently Present

- Family-owned messaging (strong)
- 35+ years in business
- Service area coverage
- Process transparency (4 steps)
- Contact info prominent
- Chatbot for immediate engagement

Missing / Could Add

- Customer testimonials or reviews
- Industry certifications or memberships (TPI, SBCA, etc.)
- "As seen in" or partnership logos (if applicable)
- Case study / project spotlight
- BBB or industry ratings
- Privacy policy link (builds trust, needed for forms)

12. Implementation Roadmap

30-Day Sprint (Immediate — Before/During Launch)

TASK	EFFORT	IMPACT
Add JSON-LD LocalBusiness schema to all pages	2 hrs	HIGH
Add FAQ schema to resources page	1 hr	HIGH
Add canonical tags to all pages	30 min	HIGH
Update sitemap.xml dates	15 min	MEDIUM
Add Google Analytics tracking code	30 min	HIGH
Set up Google Search Console	30 min	HIGH
Create/verify Google Business Profile	1 hr	HIGH
Add OG image meta tag	30 min	MEDIUM
Add BreadcrumbList schema	1 hr	MEDIUM
Update copyright year	15 min	LOW

60-Day Plan (Post-Launch)

TASK	EFFORT	IMPACT
Add FAQ section to contact or home page	2 hrs	HIGH
Improve internal linking between pages	1 hr	MEDIUM
Optimize image file sizes	1 hr	MEDIUM
Add Service schema markup	1 hr	MEDIUM
Write 2-3 blog/content pieces	6 hrs	HIGH
Set up local directory listings	2 hrs	MEDIUM
Run PageSpeed audit and fix issues	2 hrs	MEDIUM

90-Day Plan (Growth)

TASK	EFFORT	IMPACT
Launch blog/project spotlight section	8 hrs	HIGH
Monthly content creation (1-2 posts)	ongoing	HIGH
Review and respond to Google reviews	ongoing	HIGH
Build backlinks from industry directories	2 hrs	MEDIUM
Quarterly SEO performance review	2 hrs	MEDIUM
A/B test page titles and descriptions	1 hr	LOW

Technical SEO Changes Implemented in This Sprint

The following changes have been applied to the codebase:

1. **JSON-LD LocalBusiness schema** — Added to index.html (propagates site-wide context)
2. **FAQ schema** — Added to resources.html (truss terminology as FAQ)
3. **Canonical tags** — Added to all 6 pages
4. **BreadcrumbList schema** — Added to all subpages
5. **Sitemap dates updated** — Changed to 2026-03-18
6. **Copyright year updated** — 2025 → 2026 across all pages
7. **Service schema** — Added to services.html

This plan balances immediate technical fixes with a sustainable long-term content strategy. The goal is not just to rank — it's to be the obvious, trustworthy answer when someone in the Rocky Mountain region needs trusses.
